

Blade Runner movie notes

Arun Woosaree

March 7, 2018

1 March 7, looking at scene 9

- Roy Baty is the most advanced ai. He talks to Leon.
- They go into some researcher's lab (Chu) who works on making eyes for the aIs
- They interrogate him to find a man called Sebastian

Here's what the prof says after pausing the movie The ai are superior to the humans in many ways

1. Roy Baty - strength
2. Leon - super strong
3. They are not affected by the cold like Chu in the lab
4. Leon puts his hand in the beaker of cryogenic liquid and is not affected by the cold
5. He tears Chu's jacket with ease
6. Roy Baty is more intelligent than the person designing the machine eyes
7. Roy Baty mentions 'fire at the angel's hell' - He seems to have a knowledge of literature
8. Roy is efficient with his words/language
9. The Nexus have a 4 year lifespan because the humans who designed the ai were worried about the ai developing emotions. The ai come back to earth from a space colony because they want to meet their Maker. (J.F. Sebastian can take them to Tyrell)

Next scene J.F. Sebastian, the builder

- Roy comes to Sebastian
- Robots kiss

Table 1: My caption

Biology	Technology
Roy: "we're not computers! We're physical"	<-
->	Everyone operates alone. No sense of community, family
	Sebastian ->Asks roy if he lives alone
	"I make friends" (he builds them)
Cold, machine like.	Last note: In what ways is technology more humane than
	Roy and priss seem to like each other. They seem to have

- roy shows emotion and concern there's only 2 of us now 'We're stupid and we're gonna die'
- Sebastian seems like he will help them
- Roy makes Sebastian beat Tyrell at chess

Prof pauses movie He tells them that he cannot extend their lifespan Roy crushes tyrell's eyes and kills him
